PROFESSIONAL EXPERIENCE

Miles Partnership

10/2023 - 07/2026

Digital Product Manager

- › Served as primary liaison between development, QA, design, and business stakeholders, owning the product backlog, roadmap, and release process across multiple concurrent client initiatives.
- › Maintained a clean, prioritized backlog aligned with business goals and sprint capacity, writing detailed user stories and acceptance criteria, and documenting assumptions, constraints, and decisions for traceability.
- › Translated stakeholder and user needs into concise, technically interpretable requirements, facilitating wireframing sessions and stakeholder demos to validate direction before engineering investment.
- › Prepared teams for sprint and feature planning with refined, estimated, and prioritized stories, clarifying requirements during sprints and reviewing completed work against acceptance criteria before release.
- › Evaluated initiatives using ROI, adoption potential, and operational efficiency metrics, developing business cases for technology investments including AI integrations, mapping solutions, and platform decisions.
- › Led workshops and brainstorming sessions with stakeholders to gather input, validate concepts, and ensure feedback was captured and reflected in the backlog and roadmap.
- › Prepared release notes, user documentation, and training materials for new features, coordinating demos and knowledge transfer sessions across internal teams and clients.
- › Applied Agile, Scrum, and Waterfall methodologies as appropriate, monitoring delivery performance and continuously refining processes to balance speed, quality, and predictability.
- › Mentored newly hired product managers and account specialists on Agile practices, backlog hygiene, and client communication standards.

Miles Partnership

06/2022 - 10/2023

Web Developer

- › Built and maintained accessible, data-driven websites for 150+ clients using PHP, Twig, CSS, JavaScript, and SQL within Drupal-based CMS environments.
- › Contributed to ground-up website builds for major destination marketing clients, spanning discovery, wireframing, architecture, and feature development.
- › Integrated third-party services, APIs, and data sources into client platforms to support marketing measurement and business intelligence goals.

KoKo PFT LLC

02/2022 - 06/2022

Software Engineer / Product Lead

- › Served as product lead for a patient-facing and physician-facing PWA for at-home COPD monitoring, owning discovery, scoping, backlog management, and delivery in Jira within a regulated environment.
- › Wrote detailed product requirements and acceptance criteria, coordinating sprint execution across developers and a firmware engineer to ship a functioning medical device product.
- › Performed hands-on testing and validation in staging environments, collaborating with the team on acceptance tests and providing prompt feedback on defects before release.
- › Architected integration between the Google Chrome WebUSB API and a Spirometer device, updating device firmware to enable reliable real-time patient data collection.

KoKo PFT LLC

10/2021 - 02/2022

Full-Stack Software Engineer

- › Compiled and debugged 25-year-old pulmonary function testing legacy code and updated frontend C# and VB6 code; managed beta and production builds via Jenkins automation server.

PRODUCT MANAGEMENT APPROACH

- › Backlog ownership and sprint execution across Agile, Scrum, and Waterfall environments, including story writing, acceptance criteria, sprint planning, refinement, retrospectives, and velocity tracking.
- › Stakeholder engagement throughout the product lifecycle, from discovery and wireframing through release, post-launch feedback, and iteration.
- › Business case development and ROI evaluation, quantifying initiative value before committing engineering resources.
- › Hands-on QA and validation in staging environments, reviewing completed work against acceptance criteria before every release.
- › Technical fluency enabling deep collaboration with engineering and architecture teams on feasibility, trade-offs, and implementation decisions.

Methods & Tools: Agile, Scrum, Kanban, Waterfall, Jira, Confluence, Productboard, Figma, Wrike, SQL, WCAG 2.2 AA, UsableNet

TECHNICAL SKILLS

CMS & Platforms: WordPress, Drupal

Languages & Frameworks: PHP, JavaScript/ES6, TypeScript, React.js, Node.js, HTML5/CSS3, Twig, C#

Integrations & APIs: Mapbox, Google Maps API, Wepilot, MindTrip AI, AWS, PostgreSQL

Data & Accessibility: SQL, UsableNet, WCAG 2.2 AA, SEO/Analytics

LEADERSHIP & VOLUNTEERING

Miles Partnership

10/2023 - 07/2026

Internal Mentor, Product & Account Teams

- › Mentor newly hired product managers and account specialists on Agile workflows, backlog hygiene, and client communication standards.

Fort Collins Rescue Mission

Ongoing

Volunteer

- › Provide direct support services to individuals and families experiencing homelessness in the Northern Colorado community.
